

São Paulo, 10th June 2009.

**To  
Organization Committee of  
Biomedical Engineering and Medical Physics World Congress**

Dear Sir

The Brazilian Society for Biomedical Engineering and Brazilian Association for Medical Physics unite the Brazilian researchers developing science and technology applied to the medical and biological area. These Societies representing this research area are very much interested to bring the 2015 World Congress to our country and considers that an important international congress such as the Biomedical Engineering and Medical Physics World Congress could contribute to the development of this area in Brazil.

Brazil has some interesting characteristics that certify the proposal to receive this prestigious World Congress, such as, great experience in organizing international congresses, low cost organization fees and fantastic touristic points.

Considering all these points this societies strongly supports the realization of the 2015 World Congress Biomedical Engineering and Medical Physics in Brazil.

Best regards
