

CZECH TECHNICAL UNIVERSITY IN PRAGUE
prof. Ing. Václav Havlíček, CSc.
rector

RNDr. Libor Judas, Ph.D., President of the Czech Association of Medical Physicists

National Radiation Protection Institute, Bartoškova 28, 140 00 Prague 4, Czech Republic
Tel: +420 226 518 290, Fax: +420 241 410 215, Email: libor.judas@suro.cz

Assoc. Prof. Jiří Hozman, Ph.D., President of the Czech Society for Biomedical Engineering and Medical Informatics of the Czech Medical Association of J.E.Purkyně

Czech Technical University in Prague, Faculty of Biomedical Engineering, Department of Biomedical Technology, Nám. Sítná 3105, 272 01 Kladno, Czech Republic
Tel: +420 728 335 738, Fax: +420 312 608 204, Email: hozman@fbmi.cvut.cz

Dear Dr. Judas and Dr. Hozman,

I am very pleased to hear that your societies and a lot of peoples from the Czech Technical University in Prague are active in a preparation of the International Union for Physical and Engineering Sciences in Medicine World Congress 2015 proposal.

Czech Technical University in Prague has a lot of successful scientific workers and research groups in the field of Biomedical Engineering. Our university has an interesting history going back to Christian Doppler, who joined Prague Polytechnic (now Czech Technical University) in 1841 being appointed a professor of mathematics and physics, and who proposed the Doppler effect here in Prague in 1842. Hence, our Czech Technical University has a very high potential to co-operate in organizing this world congress together with your societies. Moreover, we have prestigious potential keynote speakers within our university as well. Our university has eight faculties, including the Faculty of Biomedical Engineering, which is one of fifteen faculties of biomedical engineering around the world. A lot of our people participated in preparation and implementation of the successful EMBEC 2005 conference as well.

I believe that a common co-operation of all mentioned subjects could be very effective and useful. Therefore I fully support this world congress application, and we are ready to participate within all possible activities. Let me cordially invite you and all the congress participants to our university not only to organize some events of your accompanying programme, but also to our laboratories and research centres.

With best wishes

July 2, 2009
